Virtual Front Door

As I have frequently observed, if a choice has to be made between a bruised Church which goes out to the streets and a Church suffering from self-absorption, I certainly prefer the first. Those “streets” are the world where people live and where they can be reached, both effectively and affectively. The digital highway is one of them, a street teeming with people who are often hurting, men and women looking for salvation or hope. By means of the internet, the Christian message can reach “to the ends of the earth” (Acts 1:8).
